

PROCESS FOR THE FERMENTATIVE PREPARATION OF L-AMINO ACIDS
USING STRAINS OF THE ENTEROBACTERIACEAE FAMILY

ABSTRACT OF THE DISCLOSURE

A process for the fermentative preparation of an L-amino acid which entails the steps of:

a) fermenting microorganisms of the *Enterobacteriaceae* family which produce the desired L-amino acid and in which at least the *poxB* gene or nucleotide sequences which code therefor are attenuated, in particular eliminated,

b) concentrating the L-amino acid in the medium or in the cells of the bacteria, and

c) isolating the L-amino acid.
